

WorldHorseWelfare

We are a charity that works to improve equine welfare by strengthening the horse-human relationship. We strive to help all horses including horses in need, horses in sport and leisure, and horses used for work and production.

We improve the lives of horses through our four key activities:

Care

Direct care provides relief to thousands of equids in immediate need through rescue and rehabilitation in Britain and through our local partners in Africa, Asia, Europe and Latin America.

Great Britain

International

Scan the QR codes to find out more about our care work in Great Britain and internationally

Experience

Research

The care we provide informs the research we support, working from our own experience or with academia to gather evidence of the causes of welfare challenges and how to address them.

Evidence

Education

Using evidence gained from research and our own experience, we share and promote knowledge of equine care, using behavioural change science, reaching hundreds of thousands of horses.

Knowledge

Influence

Our evidence-based knowledge and experience means we are trusted, helping us to achieve long-lasting change through shaping attitudes, policies and legislation to sustainably improve welfare for millions of equids.
